

UIT2201: Computer Science and the IT Revolution

Background Information Sheet

(to be returned by 12-Aug-2016, or asap after that.)

I am collecting information on your background, your major, your prior exposure to IT and Computational Thinking (CT), and your personal objectives in taking the course. I will use the info *only* to help me steer the direction of the course. Your input will be helpful in letting me set the pace of the course.

(Note: These information will be kept confidential.)

Name: _____

Faculty/Major: _____

Year-of-Study: _____

NUS-email: _____

Your Facebook ID: _____

Things I hope to achieve by taking this course:

(Rank the top 3 reasons starting from 1,2,3...)

_____ I need it for my USP quota

_____ I need an "easy" course this semester

_____ I want to learn programming

_____ I aim to be an IT-related start-up / business

_____ To learn about the IT Revolution

_____ I want to start a revolution

_____ Others (please state)

_____ *inspired* by Pokemon GO, of course!

My Prior Exposure to IT / Computer Science

(Please tick any that applies to you.)

_____ Is a computer whiz-kid

_____ Is a computer science major/minor

_____ Has done some programming before

_____ Is computer literate (knows Office, email, surfing, FB, games, etc)

_____ What is a computer? Computer Illiterate

_____ Others. (Please state) _____

My Computational-Thinking (CT) and/or Programming-Related Experience

(List talks/seminars/workshops you attending on CT or related topics.)

(List the languages (Java, C, C++, C#, python, php, perl, javascript, basic/VB, csh, etc) and the level of competence (Beginner / Competent / Expert). Eg: python--Competent

• _____

• _____
